

- **Materials –**

- **Materials Provided by MoreSteam**

- Microsoft® Excel® templates for problem solving and statistical analysis - available as downloads within the course material.

- **Materials Provided by Six Sigma Security**

- Supplemental material as it relates to Security – Sent to student once signed up for the course.

- **Materials Provided by Student/Company**

- General Purpose Statistics Software is useful but not necessary. Excel templates are provided by the course for statistical analysis. If you do not have a statistics package, options range from free internet downloads to higher-end packages like Minitab, Statistica, JMP etc. You can download a 30-day evaluation copy of most statistics packages over the Web.
- Microsoft Office (Word, Excel, Powerpoint). Office 2003 or higher is recommended. Office 97 and 2000 do not take advantage of all Excel template features.
